

ReplacementWindowRipoff.org

Protect your home from the
replacement window pirates.

Don't ruin your home with replacement windows!

If you have an older home with original heartwood windows, iron pulleys, cotton sash cords, and good old-fashioned storm windows, you need to find out the truth about replacement windows:

Replacement windows do not save energy. Find out the tricks that are used to hide the truth.

For a few dollars a window you can have original windows that perform better and last much longer than replacements. Do-it-yourself or restoration is far more cost effective.

Replacement windows do not last. Replacements last around 20 years. Historic windows can last hundreds of years. Once you install replacements, it's already time to start saving for the next set.

Replacement windows decrease the value of your home. The fantasy based on misinformation has passed.

A replacement window will never save enough energy to come anywhere close to paying for itself.
